Modern rear end with impact-resistant LED tail lights

Upgrade to ERMAX tail lights – Truck version

ERMAX LED tail lights with time-saving mounting – directly integrated in the vehicle

A finished pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light™ tail lights (TM5 and TM10) possible.

Time-saving up to 8 hours for one vehicle using the plug & play design.

Configuration – Upgrading of vehicle without junction box

ERMAX Adapter cable

Configurations - Vehicle type and cables

Type	Adapter	Rear cable, 3/2-functions rear lightst - 2 x 3 pcs	Outer end marker lights examples (right / left)	Reversing light

Plug & Play solution - with junction box and AUX functions

ERMAX LED tail lights with time-saving mounting – directly integrated in the vehicle

A finished pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light™ tail lights (TM5 and TM10) possible – a solution making many AUX functions / connections possible by means of junction box and further plugs.

Time-saving up to 8 hours for one vehicle using the plug & play design.

Configuration – Upgrading of vehicle with junction box

Plug & Play solution - with crane module

ERMAX LED tail lights with time-saving mounting – directly integrated in the vehicle

A finished pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light™ tail lights (TM5 and TM10) possible – a solution making many AUX functions / connections possible by means of junction box and further plugs.

Time-saving up to 8 hours for one vehicle using the plug & play design.

Configuration - Upgrading of vehicle with crane module without connection to trailer

Plug & Play solution - with crane module and connection to trailer

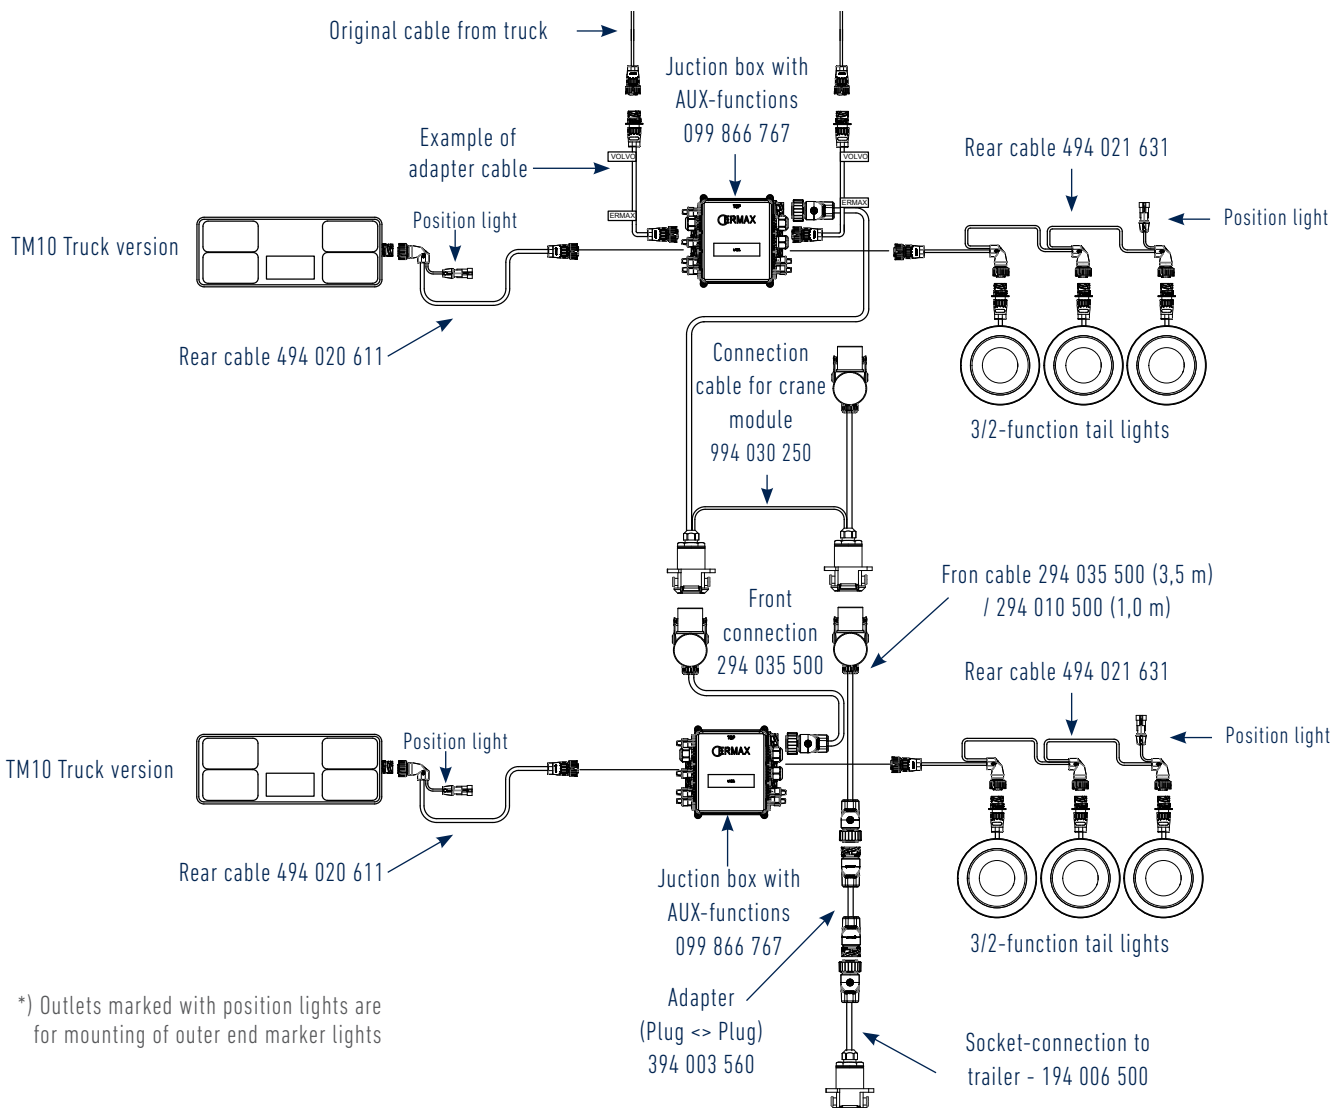

ERMAX LED tail lights with time-saving mounting – directly integrated in the vehicle

A finished pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light™ tail lights (TM5 and TM10) possible – a solution making many AUX functions / connections possible by means of junction box and further plugs.

Time-saving up to 8 hours for one vehicle using the plug & play design.

Configuration - Upgrading of vehicle with crane module and socket connection for trailer on the crane module

*) Outlets marked with position lights are for mounting of outer end marker lights

Plug & Play solutions from Ermax

- Developed for the technically easier and time-saving mounting

Time-saving and easy mounting

Length reduction, stripping, use of cable shoes etc. will be eliminated with this development from Ermax. A finished pre-assembled cable system means a plug & play solution of cable, plug and lights for vehicle building or rebuilding – meaning a time-saving and flexible mounting.

Ermax offers plug connections consisting of 2, 7 or 15-poled plugs and sockets – plug connections all of very high quality – mounting and maintenance are easily made. Ermax plug connections are being used in all our lighting systems for 24V heavy vehicles and trailer systems. All parts are easily mounted process secured and time-saving.

The plug connections are remoulded which ensures high quality and a long life-time. Cables and plugs are ADR approved and tested according to IP Rating 69K protection.

Junction box with many possibilities

With Ermax junction box integrated in the cable system you will have all the AUX functions normally found at a trailer.

In other words – here is the possibility to use all pre-configured ISO012098 connections (pin 9-15). This might be functions as working lights, warning lights, beacons or common power supply..

By using Super Seal sockets or cable connectors all functions are available.

By solutions for crane module it is necessary that the tail lights are connected to the connection box, thus the tail lights thus can be connected to the crane module

2 poled Super Seal plugs

7 poled AMP 1.5 plugs

15 poled Ermax Bayonet plugs

TM10 tail light hybrid & full-LED for Truck

The flexible light for every application

The modern and impact-resistant tail light from Ermax with long-lasting advantages

The TM10 7-function tail light from Ermax is available in two versions: As a hybrid version for an innovative design and as full-LED being the most economical solution. Both versions can be used for truck and trailer creating a uniform look at both the truck and the trailer .

Hybrid version - with modern position light and license plate light in LED and other functions with bulb technology. The hybrid tail lights can be converted into full-LED according to customer needs due to the modular design.

Full-LED – the economical solution with a minimum of wear and a long life-time.

Hybrid

Full-LED

AMP socket placed in the back

Description

Lens: Impact resistant polycarbonate
Housing: Polypropylen (PP)
Dimension: 390 x 155 x 80 mm
Bolt hole distance: 152 mm / M8
IP-Rating: IP54

Wide range of applications - All inclusive

Highlights

- Unbreakable - Impact-resistant lens made of polycarbonate
- Hybrid or full-LED
- Eternal Light™ - newest LED technology
- Durability - Long life with the newest LED technology and high vibration resistance
- Applicable for truck and trailer
- Ideal for inloaders (well-bed trailers) with upright mounting
- Certified according to all relevant standards and regulations in Europe

TM5 tail light full-LED

Space saving – ultra thin build-in depth

Unsurpassed durability and impact-resistant lens of polycarbonate

The TM5 Eternal Light® tail light is ultra-thin and the mounting thus easy and flexible.

The light distribution is unique for heavy-duty vehicles – made like the softly stroked light, which is known from passenger cars, and gives a high visibility and modern light distribution.

Description

Tail light with Eternal Light™ technology - for built-in

- Lens: Impact resistant polycarbonate
- Housing: Impact resistant polycarbonate
- Dimension: Ø155 x 32 mm
- Built-in: Ø127 mm
- Mounting holes: 3 stk Ø4,5 mm i 120° fordelt i Ø135 mm
- IP-Rating: IP67

Wide range of applications - All inclusive

Highlights

- Unbreakable - Impact-resistant lens made of polycarbonate
- Full-LED
- Increased visibility - Eternal Light® technology
- Ultra slim-line for optimal integration in underrun protection bar - maximum built-in flexibility
- Twist mounted chrome ring - easy maintenance
- Certified according to all relevant standards and regulations in Europe

LED Reverse lights and Work lights

Easy maintenance

Various connection variations

ERMAX work lights are available with various connection variations – connection cable with Open-End, Super Seal socket or “Deutsch” socket.

For connector variants, Ermax always offers a standard cable length of 300 millimeters to the first plug connection. The cable length can be adjusted according to need by means of standard extension cable or adapter cable. This ensures optimum ease of maintenance.

The large variety of cable solutions ensures the best installation without having to adjust the cable length (see page 23-27).

Connection / Extension possibilities ERMAX work lights

Super Seal socket

Extension cable with Super Seal connection

Y-Adapter with 3 x Super Seal plugs

Reverse light connected as a chain

-connected by a side cable with 1 inlet and 2 outlets with Super Seal plugs

2 pieces of Ermax reverse lights or work lights are allowed to be connected to an Ermax tail light (Max 52W)

Technical features ERMAX reverse lights and work lights

Technical specifications - Common to all variants

- Impact-resistant lens made of polycarbonate
- Housing made of aluminium, black lacquer (anti corrosion layers)
- Mounting bracket made of stainless steel, AISI 304 quality
- Mounting bolts M8 / 30 mm
- Multivolt 12/24V
- Working temperature -40 °C bis +65 °C
- Flood light pattern
- Colour temperature 6.500 °Kelvin
- Protection class IP69K
- Overheating and reverse polarity protection
- ADR and EMC/R10 approved
- ECE-R23 approved

Advantages of the newest LED light technology

- which are optimally utilised in the Ermax reverse lights and work lights

The advantages of the newest LED technology, which are optimally utilised in the ERMAX reverse lights and work lights - result in a product with a very high quality and extremely long life - and thus cost-effectiveness, which is a real highlight.

- High light output
- Extremely long lifetime
- 100% water & dustproof
- Low power consumption
- Maintenance free
- High shock and vibration resistance
- Effective heat conduction
- Increased profitability
