

CHASSIS BUILDING

Flexible solutions with Plug & Play

Material- and symbol explanation Ermax lighting

Material explanation	
PMMA	Acrylic plastic (polymethylmethacrylate) Maximum working temperature: 70-110 °C Melting point: 160°
PP	Polypropylene Maximum working temperature: 80-90 °C Melting point: 165°
PC	Impact resistant polycarbonate Maximum working temperature: 135 °C Melting point: 300 °C.
ABS	Thermoplast - Black plastic Maximum working temperature: 80-105 °C.

Symbol explanation	
	ECE approved
	ECE Approved R65
	Electromagnetic test according to R10
	CE Approved
	ADR/GGVs - Approved for use on vehicles carrying dangerous goods
	Meets guidelines for the use of retro reflective safety markings on heavy vehicles
XA1 / XA2	X - Direction indicator unit A - Amber 1 - Class 1 2 - Class 2

ERMAX® – YOUR PARTNER FOR COMPLETE LIGHTING SYSTEMS

ERMAX A/S

– develops, manufactures and distributes a wide range of products within lighting, junction boxes and cable systems for commercial vehicles and industrial applications.

A unique set-up with a combination of our factory in Denmark and licensed production with our own tools at a number of selected and exclusively certified partners worldwide, offers an extensive, highly competitive and qualitative range of products.

The Brand – ERMAS®

Founded in 1948 the Ermax® lighting technology has been manufactured for the automotive industry for almost 7 decades.

Ermax is the partner, when it comes to understanding and fulfilling the needs of lighting; with tail lights, warning lights, beacons, side markers or work lights – nowadays bulb, LED as well as in hybrid technologies. These lighting components are being offered within a complete solution concept of ADR approved

cables and, where required, junction boxes as well as mounting hardware. All cable sets are configured with multiple connector types to ensure the best lifetime service ability.

Why Ermax® Lighting Systems ?

Partnership through quality, reliability and competence.

Our competence in partnering with you, is our extensive experience in being an OEM partner with quality and on time delivery as daily focus to ensure expectations and execution match entirely with your requirements.

All our products hold the necessary certifications for E-marking, IP-protection, ADR-approval and design predictions to ensure exclusive design and durability as well as non-violation of patents.

With reliable and planned processes you will reach your goal safely with us as partner.

ERMAX A/S, Kolding, Denmark

DISTRIBUTION NETWORK WORLDWIDE

Always close to you

As a member of the BPW Group, which operates worldwide, we have an unique sales and distribution network with local offices and support for the benefit of all our business partners.

SOLUTIONS - AS INDIVIDUAL AS YOUR TASKS AND REQUIREMENTS

As ERMAX customer you will achieve the following:

- High quality for every area
- Vehicle-customised solutions
- Focus at the newest technology and innovative products with recognizable design
- Production company with development competences under one roof
- European after-sales service network

ERMAX lighting systems:

- Wide palette including cables, plugs and lights - all according to customer requirements
- LED and SIMAC control unit built in tail light
- Eternal Light® -increasing traffic safety
- ADR approved cable kits with 7 poled AMP 1.5 and Super Seal plugs
- Unbeatable, impact resistant and long life solutions

ERMAX CABLE SYSTEMS FOR 24V

OVERVIEW AND INTRODUCTION TO PLUG CONNECTION

ERMAX connections consist of 2, 3, 4, 7 and 15 poled plugs and sockets connections– all of high quality and easy and simple to mount and maintain. These connections types are used in all ERMAX cables and lighting systems for truck and trailer 24V.

All ERMAX connection are remoulded, which ensures a high quality and long life solution. cables, plugs and sockets are ADR approved and tested according to IP rating 69K.

Super Seal connection

Super Seal sockets and plugs (respectively 2, 3 and 4 poled) make mounting of e.g. position lights, side marker lights, outer end marker lights and work lights easy, reliable and simple.

- Easy and simple mounting
- Easy replacement of light component in case of damage
- Extremely durable and long life connection

Click-in connection

2 poled Click-in makes mounting of position lights, side marker lights, outer end marker lights and other 2 poled components easy and simple.

- Easy and simple mounting
- Fast positioning
- Time-consuming parts replacement

Deutsch (DT) connection

Deutsch sockets and plugs – (respectively 2 and 4 poled) make mounting of e.g. position lights, side marker lights, outer end marker lights and work lights easy, reliable and simple.

- Easy and simple mounting
- Easy replacement of light component in case of damage
- Extremely durable and long life connection

Overview of dimension and pin configuration of all Ermax connections can be found in the last section of this catalogue

7 and 4 poled AMP 1.5 connection

7 and 4 poled AMP 1.5 connections are used to connect ERMAX tail lights to the cable system. It can also be used to connect other extra components to the system.

- Rounded off pin-legs and bayonet lock ring
- Extremely durable connection
- Standard plug connection- commonly known in the market

15 poled ERMAX Bayonet connection

15 poled ERMAX bayonet connection is used to connect front cable, main cable and rear cable as well as in the case of mounting a junction box.

- Rounded off pin-legs and bayonet lock ring
- Extremely durable connection
- Standard plug connection- commonly known in the market

Plug & Play solution for vehicle building
Modern rear end with intelligent wiring

Plug & Play solution from Ermax

Developed for the technical and more simple and time-saving installation

ERMAX Plug & Play upgrading kit with many advantages and opportunities

- A pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light® tail lights
- Possibility for flexible connections for e.g. extra position light, outlets for reverse light and reverse gear alarm, without interfering with the existing wiring
- Higher quality and safety when connecting the cables with the plug & play solutions
- Time-saving up to 8 hours for a standard vehicle - and even bigger time-saving with customized solutions
 - plug & play installation of plugs, cables and lights
 - Junction box with Super Seal sockets or cable glands for all lighting functions
- Secure and documentable installation
- No change of liability in warranty obligations, as existing wiring will not be opened
- Easy to replace damaged parts
- All functions are accessible with either Super Seal sockets or cable glands
- The Standard upgrading kits are packed individually in a box - Simple and effective

Time-saving and easy mounting

Length reduction, stripping, use of blade receptacles etc. will be eliminated with this development from Ermax. A finished pre-assembled cable system means a plug & play solution of cable, plug and lights for vehicle building or rebuilding – meaning a time-saving and flexible mounting.

Ermax offers plug connections consisting of 2, 7 or 15-poled plugs and sockets – plug connections all of very high quality – mounting and maintenance are easily made. Ermax plug connections are being used in all our lighting systems for 24V heavy vehicles and trailer systems. All parts are easily mounted, process secured and time-saving.

The plug connections are remoulded which ensures high quality and a long life-time. Cables and plugs are ADR approved and tested according to IP Rating 69K protection.

2 and 3 poled Super Seal connection

4 and 7 poled AMP 1.5 connection

15 poled Ermax Bayonet connection

Junction box for Plug & Play time-saving solution

Junction box with many possibilities

With Ermax junction box integrated in the cable system you will have all the AUX functions normally found in a trailer.

Junction box - Universal

Junction box - for crane module

In other words – here is the possibility to use all pre-configured ISO12098 connections (pin 9-15). This could be functions as e.g. working lights, warning lights, beacons or power supply.

All functions are available by using Super Seal sockets or cableglands

For the crane module solution, it is mandatory that the tail lights are connected in the junction box, as the tail lights can thus be passed on to the crane module.

Plug & Play configuration - Time-saving mounting

Open end configuration - Time-demanding mounting

Junction box - Open end

Plug & Play solutions - without junction box

ERMAX LED tail lights with time-saving mounting – directly integrated in the vehicle

A finished pre-assembled cable set makes a direct plug & play mounting of plugs, cables and ERMAX Eternal Light tail lights (TM5 and TM10) possible.

Time-saving up to 8 hours for one vehicle using the plug & play solution.

Configuration - Upgrading of vehicle without junction box

*) Outlets marked with position light are for connection of outer end marker light

See section "Tail lights" for other variations of ERMAX tail lights

ERMAX Adapter cable

Volvo / Renault

Mercedes Benz

MAN

DAF and IVECO

Configuration - Vehicle type and cables

Crane module chassis building - Front cable

	Application / Description	Article No.
	Front cable with 15 poled socket, straight ISO Standard: 12098 With Ermax bayonet plug Conductor cross-section: 12x1 mm² + 3x2,5 mm² Cable type: FLRYY / PVC 15 core cable 600 mm	194 006 500
	15 core cable 600 mm 2x2 poled outlet with Super Seal socket ISO 12098 pin 5 position left + pin 6 position right	194 006 501
	Easy to connect additional position lights by using the 2 poled Super Seal outlets	
	Front cable with 15 poled plug, straight ISO Standard: 12098 With Ermax Bayonet plug Conductor cross-section: 12x1 mm² + 3x2,5 mm² Cable type: FLRYY / PVC 15 core cable 1.000 mm 15 core cable 3.500 mm 15 core cable 4.800 mm	294 010 500 294 035 500 294 048 500
	15 core cable 4.800 mm 2x2 poled outlets with Super Seal sockets ISO 12098 pin 5 left postion + pin 6 right position	294 048 501
	Easy to connect additional position lights by using the 2 poled Super Seal outlets	

Crane module chassis building - Main cable adapter & connection cable

	Application / Description	Article No.
	Main cable Adapter 15 poled Ermax bayonet plug > plug Conductor cross-section: 12x1 mm²+3x2,5 mm² Cable type: FLRYY / PVC 15 core 300 mm	394 003 560
		
	Connection cable for crane chassis building ISO12098 plug > 2 x ISO12098 socket + 15 poled Ermax bayonet plug ISO12098 plug with 500 mm 15 poled cable for ISO12098 socket (trailer connection) 1.000 mm 7 poled cable for ISO12098 socket (connection for crane module) 1.500 mm 15 poled cable with 15 poled Ermax plug for junction box. Applies in connection with junction box 099866767 Conductor cross-section: 15 core cable : 12 x 1,0 mm² + 3 x 2,5mm² 7 core cable : 7 x 1,0mm² Cable type: FLRYY / PVC	994 030 250
	 Above connection cable should be applied together with junction box 099 866 767 for crane chassis building 	

Junction box crane module - chassis building

	Application / Description	Article No.
	Junction box for crane module chassis building (in connection with coil cable 994 030 250) Black plastic housing IP Rating: IP 67 High cover - Connection possibilities: Inlet: 1 x 15 poled Ermax bayonet socket Outlet: 4 x 7 poled AMP socket (Pos. 2, 3, 6, 7) 3 x Cable through rubber grommet 2 x ø5,5 mm (Pos. 10, 11, 14) 1 x Super Seal socket, position light right (Pos. 5) 1 x Super Seal socket, position light left (Pos. 1) 1 x Super Seal socket, reverse (Pos. 8) 1 x Super Seal socket, AUX1 (Pos. 12) 1 x Super Seal socket, AUX2 (Pos. 9) 1 x Super Seal socket, AUX3 (Pos. 13) The vehicle's original tail light functions should be connected to the junction box with e.g. an adapter cable with 7 poled AMP socket. Tail lights should be connected to 7 poled AMP sockets.	099 866 767
		

Plug & Play solutions for SCANIA

SCANIA - Plug & Play solution TM5 LED tail light

A complete upgrading kit from ERMAS with LED tail lights and time-saving mounting - directly integrated on the vehicle

A pre-assembled cable set enables a direct plug & play mounting of plug, cables and ERMAS Eternal Light® tail lights (TM5, TM10 and TM11) – a solution with opportunity for flexible connections of e.g. position lights, reverse light and reverse gear alarm, all without opening the existing wiring on the truck. In addition to this high quality solution, a significant time-saving on the vehicle is achieved by using this plug & play solution.

STANDARD upgrading kit with TM5 tail light 3 function

Article no. TM091050010

OBS - It is possible to disconnect the reverse gear alarm from the truck, if rear cable 494 016 667 is installed in connection with the external reverse gear alarm.

ERMAX Plug & Play upgrading kit with many advantages and opportunities

- Time-saving up to 8 hours
 - plug & play installation of plugs, cables and lights
 - Junction box with Super Seal sockets or cable glands for all lighting functions
- Secure and documentable installation
- No change of liability in warranty obligations, as existing wiring will not be opened
- Easy to replace damaged parts
- All functions are accessible with either Super Seal sockets or cable glands
- The Standard upgrading kits are packed individually in a box - Simple and effective

Time demanding installation with junction box and open end solution

Plug & Play mounting - Time-saving

Drawing of complete lighting system with various options of functions

- Option to integrate more lighting functions if needed
- Outlet for reverse light and/or reverse gear alarm from the rear cable
- Easy and time-saving mounting, also for retrofitting

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050010 on previous page.

Drawing of rear cable 494 012 666 with outlet for reverse light, mounted on both sides of the vehicle (without reverse gear alarm)

OBS** Connection of reverse lights to rear cable 494 012 666

- Is possible by applying Y-adapter 894 005 230 or by applying both the Y-adapter and extension cable (as shown on above drawing). The alternativ could be the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lenghts are available.

SCANIA - Plug & Play solution TM10 LED tail light

STANDARD upgrading kit with TM10 tail light 6-function

Article no. TM091050015

Complete lighting system Standard TM091050015 with various options - without reverse gear alarm

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050015 as shown above.

OBS** Connection of reverse lights to rear cable 494 012 664

- is possible by applying the Y-adapter 894 005 230 (as shown on above drawing) or by applying the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lengths are available.

Double lighting installation with TM10 tail lights - alternatively original SCANIA tail lights with various options of lighting functions

Reverse gear alarm *

Rear cable 494 012 667 should be mounted in the right side of the vehicle, where to the reverse gear alarm should be connected, if it is required to control and mute the reverse alarm from the truck. The third lighting connection should be blinded with blanking plug 099 110 025

Double lighting installation with original SCANIA tail lights

Plug & Play installation of additional side marker light

It is possible to install additional side marker lights (originals) with the ERMAX side cable adapter with MCP2 plug

- Easy and simple, also for retrofittings

Side cable - Adapter

SCANIA

Connection: 3900 mm -1 x inlet with MCP2 socket
2 x outlet with MCP2 plug

Distance between plugs: 1 x 200 mm + 1 x 3.700 mm

Conductor cross-section: 2 x 0,5 mm²

Cable type FLRYY / PVC

Approval ADR

Plug & Play solutions for VOLVO

VOLVO - Plug & Play solution TM5 LED tail light

A complete upgrading kit from ERMAS with LED tail lights and time-saving mounting - directly integrated on the vehicle

A pre-assembled cable set enables a direct plug & play mounting of plug, cables and ERMAS Eternal Light® tail lights (TM5, TM10 and TM11) – a solution with opportunity for flexible connections of e.g. position lights, reverse light and reverse gear alarm, all without opening the existing wiring on the truck. In addition to this high quality solution, a significant time saving on the vehicle is achieved by using this plug & play solution.

STANDARD upgrading kit with TM5 tail light 3-function

Article no. TM091050020

OBS - It is possible to disconnect the reverse gear alarm from the truck, if rear cable 494 016 667 is installed in connection with the external reverse gear alarm.

ERMAX Plug & Play upgrading kit with many advantages and opportunities

- Time-saving up to 8 hours
 - plug & play installation of plugs, cables and lights
 - Junction box with Super Seal sockets or cable glands for all lighting functions
- Secure and documentable installation
- No change of liability in warranty obligations, as existing wiring will not be opened
- Easy to replace damaged parts
- All functions are accessible with either Super Seal sockets or cable glands
- The Standard upgrading kits are packed individually in a box - Simple and effective

Time demanding installation with junction box and open end solution

Plug & Play mounting - Time-saving

Drawing of complete lighting system with various options of functions

- Option to integrate more lighting functions if needed
- Outlet for reverse light and/or reverse gear alarm from the rear cable
- Easy and time-saving mounting, also for retrofitting

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050020 shown on previous page.

Drawing of rear cable 494 012 666 with outlet for reverse light, mounted on both sides of the vehicle (without reverse gear alarm)

OBS** Connection of reverse lights to rear cable 494 012 666

- Is possible by applying Y-adapter 894 005 230 or by applying both the Y-adapter and extension cable (as shown on above drawing). The alternativ could be the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lenghts are available.

794 020 230

694 030 200

VOLVO- Plug & Play solution TM10 LED tail light

STANDARD upgrading kit with TM10 tail light 6-function

Article no. TM091050025

Complete lighting system Standard TM091050025 with various options - without reverse gear alarm

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050025 as shown above.

OBS - The outer end marker can also be delivered with an open end cable - which makes it possible to connect the outer end marker in the TM10 tail light

OBS** Connection of reverse lights to rear cable 494 012 664

- is possible by applying the Y-adapter 894 005 230 (as shown on above drawing) or by applying the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lengths are available.

Double lighting installation with TM10 tail lights - alternatively original VOLVO tail lights with various options of lighting functions

Reverse gear alarm *

Rear cable 494 012 667 should be mounted in the right side of the vehicle, where to the reverse gear alarm should be connected, if it is required to control and mute the reverse alarm from the truck. The third lighting connection should be blinded with blanking plug 099 110 025

Double lighting installation with original VOLVO tail lights

Plug & Play installation of additional side marker light

It is possible to install additional side marker lights (originals) with the ERMAS side cable adapter with MCP2 plug

- Easy and simple, also for retrofittings

Side cable - Adapter

VOLVO

Connection: 3900 mm -1 x inlet with MCP2 socket
2 x outlet with MCP2 plug

Distance between plug: 1 x 200 mm + 1 x 3.700 mm

OBS - The outer end marker can also be delivered with an open end cable - which makes it possible to connect the outer end marker in the TM10 tail light

OBS** Connection of reverse lights to rear cable 494 012 664

- Is possible by applying Y-adapter 894 005 230 or by applying both the Y-adapter and extension cable (as shown on above drawing). The alternativ could be the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lenghts are available.

Double lighting installation with TM10 tail lights with various options of functions

Double installation with original MERCEDES tail lights

Plug & Play installation of work lights in front of the truck

It is possible to install work lights with the 4 poled AMP plug placed in front of the truck by using the ERMAX adapter

- Easy and simple, also for retrofittings

Adapter cable

MERCEDES

Connection: 500 cable with
Super Seal plug > 4 polet AMP socket

Conductor cross-se-
ction: 2 x 1 mm²

Cable type: FLRYY / PVC

Approval: ADR

Article no.: 994 005 116

Position	Color	Function
1	Brown	Ground (-)
2	Blue	Plus (+)

Pin configuration - 4 poled AMP plug		
Position	Color	Function
1	Blue	Plus (+)
2	Brown	Ground (-)
3	-	(Not connected)
4	-	(Not connected)

Plug & Play installation of additional side marker lights

It is possible to install additional side marker lights (originals) with the ERMAX side cable adapter with MCP2 plug

- Easy and simple, also for retrofittings

Adapter 694 039 205

Side marker light 098 221 357
(example)

- Remove the side cable from the existing side marker light (from where the extension of the side cable is required)
- Connect the ERMAX side cable adapter to the existing side cable (socket)
- Mount the existing side marker light onto the new side cable - and connect then the new side marker light
- By mounting additional side cables, it is possible to extend the side cable further

Side cable - Adapter

MERCEDES

Connection: 3900 mm -1 x inlet with MCP2 socket
2 x outlets with MCP2 plug

Distance between plugs: 1 x 200 mm + 1 x 3.700 mm

Conductor cross-section: 2 x 0,5 mm²

Cable type: FLRY Y / PVC

Plug & Play solutions for MAN

MAN - Plug & Play solution TM5 LED tail light

A complete upgrading kit from ERMAX with LED tail lights and time-saving mounting - directly integrated on the vehicle

A pre-assembled cable set enables a direct plug & play mounting of plug, cables and ERMAX Eternal Light® tail lights (TM5, TM10 and TM11) – a solution with opportunity for flexible connections of e.g. position lights, reverse light and reverse gear alarm, all without opening the existing wiring on the truck. In addition to this high quality solution, a significant time saving on the vehicle is achieved by using this plug & play solution.

STANDARD upgrading kit with TM5 tail light 3-function

Article no. TM091050040

ERMAX Plug & Play upgrading kit with many advantages and opportunities

- Time-saving up to 8 hours
 - plug & play installation of plugs, cables and lights
 - Junction box with Super Seal sockets or cable glands for all lighting functions
- Secure and documentable installation
- No change of liability in warranty obligations, as existing wiring will not be opened
- Easy to replace damaged parts
- All functions are accessible with either Super Seal sockets or cable glands
- The Standard upgrading kits are packed individually in a box - Simple and effective

Time demanding installation with junction box and open end solution

Plug & Play mounting - Time-saving

Drawing of complete lighting system with various options of functions

- Option to integrate more lighting functions if needed
- Outlet for reverse light and/or reverse gear alarm from the rear cable
- Easy and time-saving mounting, also for retrofitting

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050040 as shown on previous page

Drawing of rear cable 494 012 666 with outlet for reverse light, mounted on both sides of the vehicle (without reverse gear alarm)

QBS** Connection of reverse lights to rear cable 494 012 666

- Is possible by applying Y-adapter 894 005 230 or by applying both the Y-adapter and extension cable (as shown on above drawing). The alternativ could be the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lenghts are available.

MAN - Plug & Play solution TM10 LED tail light

STANDARD upgrading kit with TM10 tail light 6-function

Article no. TM091050045

Complete lighting system Standard TM091050045 with various options - without reverse alarm

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050045 as shown above.

Article no. TM091050055

Complete lighting system Standard TM091050055 with various options - without reverse gear alarm

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050055 as shown above.

OBS - The outer end marker can also be delivered with an open end cable - which makes it possible to connect the outer end marker in the TM10 tail light

Double lighting installation with TM10 tail lights with various options of functions

Reverse gear alarm *

Rear cable 494 012 667 should be mounted in the right side of the vehicle, where to the reverse gear alarm should be connected, if it is required to control and mute the reverse alarm from the truck. The third lighting connection should be blinded with blanking plug 099 110 025

OBS** Connection of reverse lights to rear cable 494 012 664

- is possible by applying the Y-adapter 894 005 230 (as shown on above drawing) or by applying the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lengths are available.

Plug & Play solutions for IVECO

IVECO - Plug & Play solution TM5 LED tail light

A complete upgrading kit from ERMAX with LED tail lights and time-saving mounting - directly integrated on the vehicle

A pre-assembled cable set enables a direct plug & play mounting of plug, cables and ERMAX Eternal Light® tail lights (TM5, TM10 and TM11) – a solution with opportunity for flexible connections of e.g. position lights, reverse light and reverse gear alarm, all without opening the existing wiring on the truck. In addition to this high quality solution, a significant time saving on the vehicle is achieved by using this plug & play solution.

STANDARD upgrading kit with TM5 tail light 3-function

Article no. TM091050050

OBS - It is possible to disconnect the reverse gear alarm from the truck, if rear cable 494 016 667 is installed in connection with the external reverse gear alarm.

ERMAX Plug & Play upgrading kit with many advantages and opportunities

- Time-saving up to 8 hours
 - plug & play installation of plugs, cables and lights
 - Junction box with Super Seal sockets or cable glands for all lighting functions
- Secure and documentable installation
- No change of liability in warranty obligations, as existing wiring will not be opened
- Easy to replace damaged parts
- All functions are accessible with either Super Seal sockets or cable glands
- The Standard upgrading kits are packed individually in a box - Simple and effective

Time demanding installation with junction box and open end solution

Plug & Play mounting - Time-saving

Drawing of complete lighting system with various options of functions

- Option to integrate more lighting functions if needed
- Outlet for reverse light and/or reverse gear alarm from the rear cable
- Easy and time-saving mounting, also for retrofitting

Components marked with blue on below drawing are possible options in relation to the standard kit TM091050050 as shown on previous page

Drawing of rear cable 494 012 666 with outlet for reverse light, mounted on both sides of the vehicle (without reverse gear alarm)

OBS** Connection of reverse lights to rear cable 494 012 666

- Is possible by applying Y-adapter 894 005 230 or by applying both the Y-adapter and extension cable (as shown on above drawing). The alternativ could be the extension cable with Super Seal plug 794 020 230 or 694 030 200 as shown below. More lengths are available.

Time-saving standard solutions

Inspiration & guidance
Lighting / LED failure control unit

TM5 tail light and "Kit-Kat" position lights

- "Kit-Kat" position lights in a modern slim set-up without visible screws.

Plug & Play - Easy and time-saving

- Simple and easy mounting
- Time-saving up to 8 hours
 - plug & play mounting of plugs, cables and lights
 - connection of extension cable 794 060 251 to existing wiring
- Mounting of position light with Super Seal side cable
- Flexible and fast

"Kit-Kat" side marker and position lights

- Mounting without visible screws
- 2 LEDs
- With reflex reflector

See all variants and part numbers at the end of this section

TM15 tail light and "Slim-line" position lights

- Slim-Line position lights in a modern narrow set-up with 6 LEDs

Open end mounting of "Slim-line" position lights

- Simple and easy mounting
- Time-saving up to 4 hours
 - plug & play mounting of plugs, cables and lights
 - connection of extension cable 794 060 251 to existing wiring
- Mounting of position light with open end in junction box

Same configuration is possible with
TM5 tail light

"SLIM-LINE" sider marker and position lights

- Small modern slim-line light
- 6 LEDs
- 12/24V

See all variants and part numbers at the end of this section

TM5 tail light and TM14 position lights

- TM14 position lights i a slim and long modern design with 10 LEDs - length 240 mm

Modern and elegant look

- Simple and flexible mounting
- Time-saving up to 8 hours
 - plug & play mounting of plugs, cables and lights
 - connection of extension cable 794 060 251 to existing wiring
- Possible to high-mount the light in the rear end of the vehicle e.g. in combination with the direction indicator from the same lighting series

TM14 Tail light - A series with various installation opportunities

- Housing and Lens made of impact resistant polycarbonate
- 10 LEDs
- different variants with direction indicator, dynamic direction indicator, stop and position light

See all variants and part numbers in the section "Tail light TM14"

Marker lights MULTI-VOLTAGE - based on needs and demands

Ideal for retrofittings, when many lights are needed

- LED side marker and position lights 12/24V
- Various designs and connection possibilities
- Large flexibility

Intelligent LED Control Units for monitoring and failure control of LED tail light

No worries – suitable for all types of vehicles regardless of the truck

ERMAX LED control units Generation 2.0 – Compatibel with all truck brands*

The new ERMAX LED control units are compatible with older monitoring technologies as well as with the new ISO13207 standard for failure control. This means, that all known vehicles and trucks regardless of production year* can communicate with the new ERMAX LED failure control units – generation 2.0 – no matter which truck, a trailer is combined with.

ERMAX LED control units Generation 2.0 technology is already used today in several variants in order to solve the known problems concerning light monitoring.

Generation 2.0 LED control units monitor the direction indicator light function and / or the stop light function, and ensure full failure control, when LED tail lights are used at the trailer. In case of light failure, the light monitoring system at the truck is activated according to the regulation ECE 48

* Valid for all known brands within EU of 12/2020

Upgrading from OEM LED tail light to ERMAX LED tail light

For most new trucks, all tail lights functions are monitored and the driver is alerted, if a tail light failure occurs. Replacing an original LED tail light with an ERMAX tail light, is usually a simple and problem free process. The vehicle is programmed to recognize the very limited consumption of the LED tail lights, and the monitoring of the light will not be affected.

Upgrading from bulb tail light to ERMAX TM11 LED tail light

There is a risk that the truck may perceive the low-consumption LED-tail lights as a defective bulb, when upgrading from a bulb tail light to a LED tail light.

Some vehicles can be reprogrammed to use LED tail light, whereas other vehicles do not offer this facility. In these cases, using ERMAX LED failure control, it is possible to achieve the correct settings, and still meet all regulations.

The truck version of ERMAX TM11 tail lights is already prepared for integrating the LED failure control of the direction indicator and stop light functions. One LED failure control unit (098298149) pr. lighting function should be mounted in each of the ERMAX TM11 tail lights. One unit for direction indicator light, if the direction indicator light is not recognized by the truck. Two units, if both lighting functions are not recognized by the truck.

Intelligent LED failure control

Upgrading from a bulb tail light to ERMAX TM5, TM7 or TM10 LED tail light

It is possible to connect 1 or 2 loose LED failure control units in series between the rear cable and tail light by using the pre-mounted standard 7 poled AMP plug, when mounting the ERMAX LED tail lights TM5, TM7 or TM10 Truck-version. One module for direction indicator light (098 298 146) and one module for stop light (098 298 148) are needed for each side of the truck.

7 functions tail light

LED failure control, stop light

Intelligent LED failure control

Monitoring of LED tail lights using junction box and LED control units pr. lighting function

In cases where other functions than direction indicator and stop light needs monitoring, it is possible to use the ERMAS universal junction box (099866700), in which the LED failure control units (098298144) are connected to the functions, which needs monitoring. One LED failure control unit per function is needed for each side.

For a complete Ermax lighting installation, the most optimal solution is to install a combined junction box ie. 099 866 700 mounted on a steel plate, on which it is possible to install up to five LED control units. This variant works simultaneously as junction box, in which all lighting functions can be accessed.

099866700

ERMAS Junction box - Universal

098298144

Universal - For all tail light functions
1 unit pr. function pr. tail light is needed

098298 144

Max.5 pcs. per junction box

Highlights ERMAS LED failure control unit Generation 2.0

*Valid for all known brands within EU as of 03/2020

- ERMAS LED control units are compatible with all brands and building-year of trucks produced in EU*, meaning that a trailer with Ermax LED failure control can be combined with all towing vehicles, old as new
- Use a technology which is NOT limited to ISO13207, and therefore suitable for all vehicles*
- Easy and flexible built-in of the small compact variants due to the long cables, meaning that they can either be mounted directly behind the tail lights or mounted further ahead at the front under the vehicle
- The new Generation 2.0 LED failure control technology is already used as an integrated part of the Ermax tail lights TM10, TM11 and TM12
- Approvals: ADR and EMC-R10

TM10 LED tail light

TAIL LIGHTS TRUCK

Eternal Light®

The best choice

ERMAX Eternal Light® offers the newest light and LED technology, and is designed for the best possible safety when driving.

The Eternal Light® technology offers the best possible homogeneous light function and has various advantages based on test results.

THE ERMAX EFFECT

14x

more powerful light *

*compared to classic LED light

Increased traffic safety

Eternal Light® lighting technology – is perceived by other road users - motorists and cyclists - earlier than classic LEDs lights or bulb lights. Contributes to reducing the number of accidents in connection with changing lanes and right turns

* Eternal light® is 14 x stronger compared to classic LED light with an 45° angle.

Soft visibility when platooning

Classical LED light is very directional, whereas Eternal light® has a more soft and homogeneous light pattern, which prevents tiredness when exposed for a long time, and thereby prevents accidents

Example of the light pattern with Eternal Light® and classic LED light:

ERMAX tail light with Eternal Light®

TM 13 Tail light LED
- ideal as a top-mounted tail light
(see description in the following
section about tail lights)

TM11 LED Tail light 12/24V

Tail light for Standard vehicles

Modern light and LED-technology

The compact and modern 7-function tail light from ERMAX

As highlights the full-LED tail light from ERMAX offers a thin design, modern dynamic indicator light, impact resistant lens and integration of all legal control units.

With ERMAX TM11 Truck tail light it is possible to integrate LED control for direction indicator light and/ or stop light. The technology used, is not limited to the ISO13207 and therefore works on all vehicles*.

The handling - according to ECE 48 - of the flashing function in the side marker lights at the same time as the direction indicator light in the tail light, is of course also fully integrated in the TM11 tail light.

High durability, modern functionalities and unique design - all united in the ERMAX TM11 tail light and thanks to the cost-effectiveness, a real highlight.

Highlights

- Unbreakable - Impact resistant lens of polycarbonate
- Multi voltage 12/24V
- Modern dynamic indicator light (running light)
- Built-in LED control for direction indicator light and stop light according to ECE 48 - compatibel with all brands and year of EU trucks*
- Built-in control of side marker light (SIMAC®) according to ECE 48 supp. 06 (since Nov. 2017)
- Control of position, rear fog and reverse light is possible
- Certified in accordance with all relevant standards and regulations in Europe

* Stand 05.2020

LED failure control for monitoring of direction indicator and/or stop light is optional

Some vehicles can be reprogrammed to use LED tail light, whereas other vehicles do not offer this facility. In these cases, using ERMAX LED failure control, it is possible to achieve the correct settings, and still meet all regulations.

The truck version of ERMAX TM11 tail lights is already prepared for integrating the LED failure control of the direction indicator and stop light functions. One LED failure control unit (098298149) pr. lighting function should be mounted in each of the ERMAX TM11 tail lights. One unit for direction indicator light, if the direction indicator light is not recognized by the truck. Two units, if both lighting functions are not recognized by the truck.

+

LED control for direction
indicator and stop light

LED control unit for direction indicator and
stop light (098298149)
- mounted in the back of the TM11 light

Outer end marker light are optional

The suitable outer end marker light for the TM11 tail light is 098 241 218 (RH/LH) short model and for long/angled model 098 241 448 / 098 241 449 (RH/LH). The outer end marker light is mounted on the bracket placed on the side of the tail light, and the Super Seal plug from the outer end marker light is mounted at the back of the tail light in the Super Seal socket.

TM 12 LED tail light 12/24 V

Unique design- and rather cool

6 function light which provides the best possible light in all kind of weather

The new ERMAX TM12 tail light is based on the newest light and LED technology, and meets the toughest standards in term of technique, quality and functionality.

TM12 tail light has a unique and modern design, and due to the compact size, the TM12 tail light is particularly suitable for vehicles with limited mounting or installation space. It is furthermore possible to integrate a LED control unit for direction indicator light in the TM12 tail light.

Unique desing, the newest light and LED technology, long durability and highest quality all united in the TM12 tail light to a wide range of vehicles - and thanks to the cost-effectiveness, a real highlight.

Highlights

- Housing and Lens made of highly resistant polycarbonate
- Multivolt 12/24V
- ERMAX patented position light - Eternal Light® - for optimum traffic safety
- Modern dynamic direction indicator light function (running light)
- Integrated LED control unit for direction indicator light according to ECE 48 (optional)
- The outer end marker light can be mounted directly on the bracket - with pre-defined breaking point
- ECE, EMC and ADR certified - with IP69K rating

Smart, modern 6 function tail light for trucks with dynamic direction indicator light
Long slim design with many LEDs which gives a beautifull and modern light pattern

Is posible to combine with the new
TM14 lighting series
- see description in the following sec-
tions with tail lights

TM 13 Tail light 12/24V - LED

Small and slim design

The perfect solution if the installation place is limited

The new ERMAX TM13 4-functions tail light in full-LED offers highlights as small, slimline and modern design for almost any application – for trailer as well as truck.

The TM13 LED tail light is due to its compact size and its slim design all-round useable and especially suitable for narrow build-in measures.

Recognizable design with Eternal Light®, newest light and LED technology and high quality are united in the ERMAX TM13 tail light – and makes the new TM13 tail light to another ERMAX innovation within lighting for heavy vehicles.

TM 4 Tail light 12/24V - LED (Surface mounting)

A classic new developed

The newest technology – integrated LED failure control

The classic ERMAX TM4 LED tail light is well-known and has been used on vehicles all over Europe for many years. Due to new vehicle technology challenges with the light function recognition, ERMAX has new developed the classic TM4 LED tail light. The new TM4 tail light now meets the highest demands in the areas of technique, quality and functionality.

The design and build-in measures of the TM4 tail light have not been changed. Quite NEW is, however, the possibility of getting the tail light with integrated LED failure control for monitoring the direction indicator light and the stop light. This means that the vehicle is able to control the light functions according to ECE regulations.

The integrated LED failure control offers many advantages, as it supports both the ISO 13207 cold test and the state-of-the-art LED monitoring.

TM4 LED Tail light

The integrated LED failure control will solve many challenges

Highlights

- LED tail light with integrated LED control for monitoring the indicator and stop light in accordance with ECE 58.
- Use of a technology that is not only limited to ISO 13207 but also takes over the monitoring of older and new vehicles*.
- Control of flashing side marker lights (SIMAC®) by using rear cable with incorporated SIMAC®.
- Space-saving and fewer interfaces in the wiring harness, as no external control units / control boxes are required.
- Easy and quick mounting. Cost-saving due to reduction of mounting time and no maintenance.
- Classic design which can easily be combined with other existing lights.
- Possibility of a unique red-white-red design.
- D-approval and thus suitable for double mounting.
- IP69K rating of the LED unit (the tail light IP54K).
- ECE-, EMC- and ADR certified.

* Applies to all well-known brands in EU countries from 11/2009

TM 4 Tail light 12/24V - LED (Surface mounting)

Convincing technology - The best choice

The newest technology for monitoring and control of LED light functions

Using the newest technology in the ERMAX TM4 tail light enables integrated LED control to monitor the indicator and stop light function. If control of flashing side marker lamps SIMAC are needed ERMAX offers several innovative solutions, which can be connected easily and intelligently as a part of the cable system or as a plug-in solution.

- The integrated LED control in the tail light for monitoring the indicator and stop light functions, using a technology which is not limited to ISO 13207 and thus can be used for all vehicle* according to ECE R48.
- Intelligent control of the flashing side marker lights SIMAC® according to ECE R48 integrated in the rear cable.

Cable system with LED failure control for direct indicator and stop light function - integrated in the TM4 tail lights

Cable system with LED failure control for direct indicator and stop light function integrated in the TM4 tail lights - and SIMAC® in the rear cable

Flexible and individual installation opportunities with ERMAX Squareline

Design the rear end of the truck based on needs and demands

OBS: If only vertical mounting, a separate legal reflector must be mounted

TM14 Slim-Line Tail light 12/24V - full LED

Individual styling with TM14 Slim-line

The perfect solution for limited space

The ERMAX TM14 Slim-Line lighting series is ideal for individual modern styling of a vehicle and can be used for both surface mounting and built-in. The TM14 Slim-Line series is in full LED and offers highlights as a narrow, slim-line and modern design suitable for almost all applications – on the trailer as well as on the truck.

Due to the size and the slim design, there are many applications possibilities – especially where there are limited and narrow mounting surfaces.

The TM14 Slim-Line light can be mounted vertically, horizontally, and as high-mounted light – and fits with the various connection possibilities optimally with ERMAX' present cable system.

The stop light can also with advantage be use as high-mounted 3. stop light.

Position and / or stop light

Direct indicator light as standard or with dynamic direct indicator light

Truck styled with TM14 position lights

Highlights

- Slim and modern design for practically any application
- Applicable for trailer and truck
- Time saving mounting with 2 poled or 3 poled Super Seal connection
- 5 m Open end versions for long wiring
- Especially suitable for vehicles with limited mounting space
- Various applications – surface mounting, built-in, horizontal and vertical mounting and as high-mounted light
- Ideal as high-mounted 3. stop light.
- Certified according to all relevant standards and regulations in Europe

TM14 Slim-line - Flexible and individual styling possibilities

Design the "rear end" according to needs and demands

Position of more lights underneath each other means more effect of the nice, modern and dynamic direction indicator light

OBS - See all variants, connection possibilities and description on next page

TM 14 Tail light LED 12/24V - Slim-line

Description

Lens: Impact resistant polycarbonate
 Housing: Impact resistant polycarbonate
 Dimension
 Surface mounting: 240 x 28 x 16,6 mm
 Built-in: 208 x 23 x 8,4 mm
 Bolt distance: 220 mm / Ø4,6
 Working temperature: -40°C til +65°C
 IP Rating: IP69K

Consumption per lighting function

Positions light: 0,6W
 Stop light: 2,0W
 Direction indicator light: 0,9W
 Dynamic direction indicator light : 4,0W

* Bi-polar connection

Accessories - Adapter cable for installation of TM14 Slim-Line to rear cable (see detailed description in the section "cables universal")

994 003 282 - Adapter cable 300 mm,

7 poled AMP socket > 2 x Super Seal plug
 with outlet for stop- and direction indicator light

994 003 285 - Adapter cable 300 mm,

7 poled AMP socket > 1 x 3 poled Super Seal plug with outlet for position and stop light + 1 x 2 poled super seal plug with outlet for direction indicator light

LICENSE PLATE LIGHTS

Technical drawings of a license plate showing front, side, and rear views with dimensions and mounting details.

Front View: A rectangular plate with a width of 594.8 and a height of 120. The mounting holes are arranged in a 2x6 grid. The distance between the center of the plate and the center of the mounting holes is 520. The mounting holes have a diameter of 38. The plate is labeled "CENTER OF LICENSE PLATE".

Side View: A semi-circular profile with a radius of 50.9. The mounting holes are located at a distance of 43 from the center of the plate. The mounting holes have a diameter of 38. The plate is labeled "CENTER OF LICENSE PLATE".

Rear View: A rectangular plate with a width of 340 and a height of 277.4. The mounting holes are arranged in a 2x6 grid. The distance between the center of the plate and the center of the mounting holes is 240. The mounting holes have a diameter of 38. The plate is labeled "CENTER OF LICENSE PLATE".

Mounting Details: The mounting holes are located at a distance of 43 from the center of the plate. The mounting holes have a diameter of 38. The plate is labeled "CENTER OF LICENSE PLATE".

REAR UNDERRUN PROTECTION BAR

Rear underun protection bar without lights ECE58-02 or ECE58-03

Packaging

The underrun protection bar can also be supplied in an anodized version with or without holes - without lights.

Packaging as single in a box or as a pallet packaging.

The different variants can be found on the following pages.

Only available as ECE R58-03

Safe delivery

Delivery in a maximally padded packaging, which ensures a safe and optimal transportation.

individually
- packed as a single box

Pallet packaging
- ECE58-02 with 25 pieces
- ECE58-03 with 20 pieces

Rear underrun protection bar ECE R58-02

Anodized - without lights

Anodized aluminium - 3 variants packed individually in cardboard box or pallet packing.

End caps and T-bolts must be ordered separately.

Spare parts and accessories

ECE R58-02

The consoles mentioned in the certificate (pos. 1) are mounted at the chassis frame. The associated reinforcement brackets (pos. 2) must be used for specific widths of the chassis frame according to the guidance in certificate.

Consoles as well as reinforcement brackets are offered from ERMAX as accessories, but may also be produced by the vehicle manufacturer, provided that the technical instruction in the certificate are followed exactly.

* When using reinforcement bracket, 8 pcs. has to be used

REVERSE & WORK LIGHT

Lumen specification

The reversing lights in the following section are specified with a theoretical and an effective lumen.

The theoretical lumen is the calculated lumen of the light source.

The effective lumen is the light measured outside the lens

Standard product programme with a large flexibility

Compact design, universally applicable and various connection possibilities

ERMAX reversing lights and work lights are available in 3 design types with different light performance / lumen

LED Reverse light

Lumen:
Theoretical 650 / effective 300

LED Work light

Lumen:
Theoretical 800 / effective 600

LED Work light

Lumen:
Theoretical 1.600 / effective 1.200

Approved as reversing light (ECE-R23) with 30° angling by vertical mounting

LED Work light

Lumen:
Theoretical 2.400 / effective 1.800

Approved as reversing light (ECE-R23)
with 35° angling by vertical mounting

This type is also available with handle and on/off switch

Universally applicable

Mounting options

ERMAX working light have a compact design with measures that they can be mounted in a very narrow place. The compact design and symmetric light distribution give a large degree of flexibility when mounting. The work lights can be standing, hanging, rear or side mounted.

Mounting options ERMAX work lights

Standing

Hanging

Side

Rear

Easy maintenance

Various connection variations

ERMAX work lights are available with various connection variations - connection cable with open end, Super Seal or Deutsch socket.

For connections variants, ERMAX always offers a standard cable length of 300 millimeters to the first plug connection. The cable length can be adjusted according to need by means of standard extension cable or adapter cable. This ensures optimum ease of maintenance.

The large variety of cable solutions ensures the best installation without having to adjust the cable length (see section with cables for all available cable lengths)

Connection / Extension possibilities ERMAX work lights

Extension cable with Super Seal plug or Deutsch DT2 plug

Y-Adapter with 3 Super Seal plugs

Reverse light connected as a chain

-connected by a side cable with 1 inlet and 2 outlets with Super Seal plugs

2 pcs. of ERMAX reverse lights or work lights are allowed to be connected to an ERMAX tail light (max 52 W)

Technical features ERMAX reverse lights and work lights

Technical specifications – Common to all variants

- Impact-resistant lens made of polycarbonate
- Housing made of aluminium – black lacquer (anto corrosion layers)
- Mounting bracket made of stainless steel, AISI 304 quality
- Mounting bolts 8 mm / 30 mm
- Multivolt 12 / 24 V
- Working temperature –40 °C til +65 °C
- Flood light pattern
- Color temperature 6.500 ° Kelvin
- IP-Rating IP69K
- Overheating and reverse polarity protection
- ADR and EMC/R10 approved
- ECE-R23 approved

Advantages of the newest LED light technology

- Which are optimally utilised in the Ermax reverse lights and work lights

The advantages of the newest LED technology, which are optimally utilised in the ERMAX reverse lights and work lights - result in a product with a very high quality and extremely long life - and thus cost-effectiveness, which is a real highlight.

- High light output
- Extremely long lifetime
- 100% water & dustproof
- Low power consumption
- Maintenance free
- Hight shock and vibration resistance
- Effective heat conduction
- Increased profitability

WIDE LOAD MARKER SIGNS

WIDE LOAD MARKER SIGN – Complete kit-set

Standardise Security

Ermax have 2 Series of wide load marker sign kits making it possible to deliver standardised solutions covering almost every need. One Proff series and one ADR series.

The wide load marker signs – built of standard parts from the Ermax programme – are easy to mount and connect, and secure a simple operation and operational reliability in the daily work.

Both series are built up with a el-galvanized holder and a square pipe for fastening at the vehicle. The wide load marker sign is mounted with 3 flexible outer end marker lights with red, white and orange light. The lights are made of rubber and the LED light module is made of impact resistant polycarbonate which resists a tough environment and handling in the daily work.

The Proff series has a pipe piece (ISO 72591) for mounting and connecting of the warning light. The connection to the wide load marker signs are made by means of a 7-poled ISO 1724 socket. Thus, a standard coil cable ISO 1724 (e.g. Ermax article number 090 180 165) can be used for connection at the vehicle. It is a commercially available cable and not a special cable, which means that defective or approaching cables can be replaced quickly = shorter service life in case of defects.

The ADR series is connected by means of a Super Seal plug, and the series is thus ADR approved in its basis configuration. Only the mounting of the warning light – due to the open plugs in the appurtenant connecting pipe – cannot be ADR approved.

For this series a coil cable (e.g. article number 994 030 300) can be used, which is connected to a corresponding Super Seal connection at the vehicle, which opens the possibility for mounting of further lights.

Wide load marker signs - Proff Series

- with 7 poled ISO 1724 connection or 3 poled connection

Wide load marker sign mounted with

- warning sign board 423 x 423 mm
- 3 pcs. outer end marker lights
- Mounting bracket for warning beacons
- Plug connection through 7 poled ISO1724 socket or 3 poled socket

- Connection with 2 poled Super Seal socket

Functions

Placement	Dimension (L x B)	Material (frame)	Connection	Article no.
Rear - Left	1.200 x 530 mm	Electro galvanized	2 poled Super Seal socket	098 269 830
Rear - Right	1.200 x 530 mm	Electro galvanized	2 poled Super Seal socket	098 269 835
Front - Left	1.200 x 530 mm	Electro galvanized	2 poled Super Seal socket	098 269 840
Front - Right	1.200 x 530 mm	Electro galvanized	2 poled Super Seal socket	098 269 845

Complete set of 4 wide load marker signs consisting of 098 269 830 + 835 + 840 + 845

098 269 850

Wide load marker signs- Spare parts (S) & Accessories (A)

Proff-Series	S / A	Pos.	
Coil cable 2x7 poled 1.500 mm - with ISO 1724 plug > ISO 1724 plug	A	1	090 180 165
Coil cable 3 core 1.500 mm - with 7 poled ISO 1724 plug > ISO 1724 plug	A	2	994 015 335
Coil cable 3 core 3.000 mm - with 7 poled ISO 1724 plug > Super Seal plug	A	2	994 030 335
On / off switch with 2x200 mm connection cable with Super Seal socket > plug	A	4	992 942 150
LED outer end marker light - with 300 mm connection cable with Super Seal plug	S	5	098 241 218
Warning light LED 12-24V with mounting bushes (see section with warning lights)	S	6	098 287 942
Mounting bracket, angled (NOT ADR approved)	S	7	098 295 562
Warning sign board - DIN 30710, one-sided aluminium, dimension: 423 x 423 (Right / Left)	S	8	098 269 123

Spare part for ISO 1724 plug - see section with plugs and sockets

ADR-Series	S / A	Pos.	
Coil cable 2 poled 3.000 mm - with Super Seal plug > Super Seal socket	A	3	994 030 300
On / off switch with 2x200 mm connection cable with Super Seal socket > plug	A	4	992 942 150
Side cable, chain 115 mm, 1 x inlet with Super Seal plug + 4 x outlets with Super Seal socket	S	9	694 011 402
LED outer end marker light - with 300 mm connection cable with Super Seal plug	S	5	098 241 218
Warning light LED 12-24V with mounting bushes (see section with warning lights)	A	6	098 287 942
Mounting bracket, angled (NOT ADR approved)	A	7	098 295 562
Warning sign board - DIN 30710, one-sided aluminium, dimension: 423 x 423 (Right / Left)	S	8	098 269 123

Wide load marker signs - Accessories

	Application / Description	Article no.
	Side cable, chain 1 x inlet with Super Seal socket and 4 x outlets with Super Seal plugs Conductor cross-section: 2 x1 mm² Cable type: FLRYY / PVC. 2 core, 800 mm Distance between plugs: 200 mm 	694 008 401
	Side cable, chain Cable for ADR wide load marker signs 1 x inlet with Super Seal plug and 4 x outlets with Super Seal socket Blanking plug mounted on the last socket Conductor cross-section: 2 x0,5 mm² Cable type: FLRYY / PVC. 2 core, 1150 mm Distance between plugs: 300 mm - 300 mm - 300 mm - 250 mm 	694 011 402
	Connection cable 2 poled, ISO 1724 Socket Socket 7 core ISO 1724 > 2 core Super Seal socket Outlets on 7 core socket: Ground (pin 31/3), Right position (pin 58R/5), Left position (pin 58L/7). Conductor cross-section: 2x1mm². Cable type: FLRYY / PVC 2 core, 1.500 mm 	994 015 245

Wide load marker signs - Accessories

	Application / Description	Article no.
	Connection cable 2 core, ISO 1724 Socket Socket 7 core ISO 1724 > Click-in adapter, 2 core Outlets fon 7 core socket: Ground (pin 31/3), Right position (pin 58R/5), Left position (pin 58L/7). Conductor cross-section: 2x1mm². Cable type: FLRY Y / PVC 2 core, 1.500 mm	994 015 275
		
	Coil cable 2 core Super Seal plug, 2 poled > Super Seal socket, 2 poled Conductor cross-section: 3x1 mm² Pin 2 (+) is connected in the 2 core coil cable Number of coils: 32 / 64 2 core, 1.500 mm 2 core, 3.000 mm	 994 015 300 994 030 300
		

Wide load marker signs - Accessories

	Application / Description	Article no.
	Coil cable 3 core Plug 7 core ISO 1724 > Super Seal plug, 2 core Conductor cross-section: $3 \times 1 \text{ mm}^2$ Numbers of coils: 64 3.000 mm Outlet on 7 core plug: Ground (pin L/1), Right position (pin 58R/5), Left position (pin 58L/7):	994 030 330
	1.500 mm Outlet on 7 core plug: Ground (pin 31/3), Right position (pin 58R/5), Left position (pin 58L/7)	994 015 335
	3.000 mm Outlet on 7 core plug: Ground (pin 31/3), Right position (pin 58R/5), Left position (pin 58L/7).	994 030 335
		
	Coil cable 2x7 poled ISO 1724 - 12V With ISO1724 plug > ISO1724 plug Conductor cross-section: $6 \times 1,0 \text{ mm}^2 + 1 \times 1,5 \text{ mm}^2$ 1.500 mm 7 core	090 180 165
	On / off switch 2 x 200 mm connection cable. Super Seal socket > Super Seal plug	992 942 150

CABLES - UNIVERSAL

Front cable

	Application / Description	Article no.
	Front cable with 15 poled socket, straight ISO Standard: 12098 With Ermax Bayonet plug Conductor cross-section: 12x1 mm² + 3x2,5 mm² Cable type: FLRYY / PVC 15 core cable 600 mm 15 core cable 6000 mm 15 core cable 7.500 mm	194 006 500 194 060 500 194 075 500
	15 core cable 600 mm 2x2 core outlet with Super Seal socket ISO 12098 pin 5 position Left + pin 6 position Right	194 006 501
	Easy to connect extra position lights if needed by using the 2 poled Super Seal outlets	

Main cable

	Application / Description	Article no.
	Front cable with 15 poled plug, straight ISO Standard: 12098 With Ermax Bayonet plug Conductor cross-section: 12x1 mm² + 3x2,5 mm² Cable type: FLRYY / PVC 15 core cable 1.000 mm 15 core cable 3.500 mm 15 core cable 4.800 mm	294 010 500 294 035 500 294 048 500
	15 core cable 4.800 mm 2x2 core outlet with Super Seal socket ISO 12098 pin 5 position Left + pin 6 position Right Easy to connect extra position lights if needed by using the 2 poled Super Seal outlets	294 048 501
	Main cable 9 core Ermax 15 poled bayonet plug > Open end with blade receptacles 6,3 x 0,8 Conductor cross-section: 8x1 mm²+1x2,5 mm² Cable type: FLRYY / PVC 9 core 6.000 mm	394 060 171
	Main cable Adapter 15 core Ermax bayonet socket > socket Conductor cross-section: 12x1 mm²+3x2,5 mm² Cable type: FLRYY / PVC 15 core 300 mm	394 003 560

Main cable

	Application / Description	Article no.
	Main cable Adapter 9 core Ermax 15 poled bayonet plug > 2 x Ermax 15 poled bayonet socket Cable length for the 15 poled outlet: 500 mm Connection for pin 13 (ISO12098) is not in the 15 poled outlet Conductor cross-section: 8x1,0 mm²+1x2,5 mm² / 7x1,0 mm² Cable type: FLRYY / PVC 9 core 300 mm	394 003 160
		
	Main cable f.eks 394 003 160 Rear cable f.eks 494 025 600 Front cable f.eks 194 060 500 Coil cable 15 poled ISO 12098 f.eks 090 165 816 Connected to the forklift	

Rear cable

	Application / Description	Article no.
	Rear cable 2 x 6 core Ermax 15 poled bayonet socket > 2 x 7 poled AMP 1,5 plug, angled Cable type: FLRYY / PVC	
	2 x 6 core 2.500 mm Conductor cross-section: 6x1 mm ²	494 025 600
	2 x 6 core 2.500 mm With 2 x 2 core outlet with Super Seal for the outer end marker lights Conductor cross-section: 6x1 mm ² / 2x1 mm ²	494 025 601
	Rear cable 6 core, chain 2 x 3 plug Ermax 15 poled bayonet socket > 2 x 3 pcs. 7 poled AMP 1,5 plug, angled Conductor cross-section: 6x1 mm ² / 2x1 mm ² Cable type: FLRYY / PVC	
	2 x 6 core 2.500 mm With 2 x 2 core outlet with Super Seal for outer end marker lights	494 025 606

Rear cable

	Application / Description	Article no.
	Real cable 6 core, chain 2 x 4 plug Ermax 15 poled bajynet socket > 2 x 4 pcs. 7 poled AMP 1,5 plug, angled Conductor cross-section: 6x1 mm² / 2x1 mm² Cable type: FLRYY / PVC 2 x 6 core 2.900 mm With 2 x 2 core outlet with Super Seal for the outer end marker lights	494 029 608

Rear cable

	Application / Description	AArticle no. rtikel-nr.
	Rear cable 6 core, single 7 poled AMP 1.5 plug, straight > 7 poled AMP 1.5-plug, angled For mounting in ERMAS junction box Cable type: FLRYY / PVC	
	6 core 1.500 mm Conductor cross-section: 6x1 mm ²	494 015 610
	6 core 2.000 mm Conductor cross-section: 6x1 mm ²	494 020 610
	6 core 2.000 mm With 2 poled Super Seal outlets for outer end marker lights Conductor cross-section: 6x1 mm ² / 2x1 mm ²	494 020 611
	6 core 2.500 mm Conductor cross-section: 6x1 mm ²	494 025 610
	6 core 2.500 mm With 2 poled Super Seal outlets for outer end marker lights Conductor cross-section: 6x1 mm ² / 2x1 mm ²	494 025 611
	6 core 3.000 mm Conductor cross-section: 6x1 mm ²	494 030 610
	6 core 5.000 mm Conductor cross-section: 6x1 mm ²	494 050 610

Rear cable

	Application / Description	Article no.
	Rear cable 6 core – single, chain 7 poled AMP 1,5 socket, straight > 2 x 7 poled AMP 1,5 plug, angled With 2 x 2 core outlet with Super Seal for position and reverse light Conductor cross-section: 6x1 mm² / 2x1mm² Cable type: FLRYY / PVC 6 core 800 mm	494 008 664
	 Easy to connect extra reverse and position lights if needed by using the 2 poled Super Seal outlets	
	Rear cable 6 core – single, chain 7 poled AMP 1,5 plug, straight > 3 x 7 poled AMP 1,5 plug, angled With 2 x 2 core outlet with Super Seal for outer end marker lights For mounting in ERMAS junction box Conductor cross-section: 6x1 mm² / 2x1mm² Cable type: FLRYY / PVC 6 core 2.100 mm	494 021 631
	 Easy to connect extra position lights if needed by using the 2 poled Super Seal outlets	

Rear cable

	Application / Description	Article no.
	Rear cable 6 core – single, chain 7 poled AMP 1,5 socket, straight > 3 x 7 poled AMP 1,5 plug, angled With 2 x 2 core outlet with Super Seal for position and reverse light Conductor cross-section: 6x1 mm² / 2x1 mm² Cable type: FLRYY / PVC 6 leder 1.200 mm  Easy to connect extra reverse and position lights if needed by using the 2 poled Super Seal outlets	494 012 666
	Y-Adapter cable 6 core 1 x 7 poled AMP 1.5 socket, straight > 2 x 7 poled AMP 1.5 plug, straight Conductor cross-section: 5x1mm² + 1x2,5 mm² Cable type: FLRYY / PVC 6 core 2 x 500 mm 	894 005 640
	2 x 300 mm With 1x2 poled outlet (200 mm) with Super Seal socket for tail light or outer end marker light Conductor cross-section: 5x1mm² + 1x2,5 mm² / 2x1 mm² 	894 003 641

Cable for side marker

	Application / Description	Article no.
	Side cable, flat For click-in system with Super Seal plug Conductor cross-section: 2x1,5 mm ² Cable type: FLYYF	
	2.000 mm for "Click-in" System	594 020 000
	4.000 mm for Click-In System	594 040 000
	7.000 mm for Click-In System	594 070 000
	9.000 mm for Click-In System	594 090 000
	10.000 mm for Click-In System	594 100 000
	13.000 mm for Click-In System	594 130 000

Cable for side marker

	Application / Description	Article no.
Suitable as extension cable for side cables with Super Seal plugs	Side cable,chain 1 x inlet with Super Seal socket + 2 x outlets with Super Seal plugs Conductor cross-section: 2x0,5 mm ² Cable type: FLRYY / PVC 3.900 mm Distance between plugs: 1x200 mm + 1x3700 mm	694 039 201
	5.200 mm Distance between plugs: 1 x 200mm + 1 x 5000 mm	694 052 201
	Side cable, chain 1 x inlet + 2 x outlets with Super Seal plugs Conductor cross-section: 2x0,5 mm ² Cable type: FLRYY / PVC 3.000 mm Distance between plugs: 1x1700 mm + 1x1300 mm	694 030 200
	4.200 mm Distance between plugs: 1x1200 mm + 1x3000 mm.	694 042 200
	5.300 mm Distance between plugs: 1x300 mm + 1x5000 mm.	694 053 200
	Sidecable, kæde 1 x inlet with open end with blade receptacles 6,3x0,8 mm > + 3 x outlets with Super Seal plugs Conductor cross-section: 2x0,5 mm ² Cable type: FLRYY / PVC 600 mm Distance between plugs: 250 mm +200 mm + 200 mm	694 006 350

Cable for side marker

	Application / Description	Article no.
	Side cable, chain 1 x inlet + 3 x outlets with Super Seal plugs Conductor cross-section: 2x0,5 mm² Cable type: FLRYY / PVC 2.500 mm Distance between plugs: 500 mm + 1500 mm + 500 mm 3.200 mm Distance between plugs: 500 mm + 1700 mm + 1000 mm 4.000 mm Distance between plugs: 1000 mm + 2000 mm + 1000 mm 8.000 mm Distance between plugs: 2000 mm + 2000 mm + 4000 mm 9.400 mm Distance between plugs: 2000 mm + 3700 mm + 3700 mm 11.500 mm Distance between plugs: 1500 mm + 5000 mm + 5000 mm 13.500 mm Distance between plugs: 4100 mm + 3900 mm + 5500 mm	694 025 300 694 032 300 694 040 300 694 080 300 694 094 300 694 115 300 694 135 300
		

Cable for side marker

Application / Description	Article no.
Side cable, chain 1 x inlet + 4 x outlets with Super Seal plug Conductor cross-section: 2x0,5 mm² Cable type: FLRYY / PVC.	
800 mm Distance between plugs: 200 mm	694 008 400
6.750 mm Distance between plugs: 500 mm + 1.750 mm + 1.500 mm + 3.000 mm	694 675 400
11.700 mm Distance between plugs: 1.200 mm + 500 mm + 5.000 mm + 5.000 mm	694 117 400
12.400 mm Distance between plugs: 3.200 mm + 2.800 mm + 3.200 mm + 3.200 mm	694 124 400
17.500 mm Distance between plugs: 7.000 mm + 3.500 mm + 3.500 mm + 3.500 mm	694 175 400
19.500 mm Distance between plugs: 9.000 mm + 3.500 mm + 3.500 mm + 3.500 mm	694 195 400
	
Side cable, chain 1 x inlet with Super Seal socket + 4 x outlets with Super Seal plugs Conductor cross-section: 2x1 mm² Cable type: FLRYY / PVC	
800 mm Distance between plugs: 200 mm - 200 mm - 200 mm - 200 mm	694 008 401
	

Extension cable

	Application / Description	Article no.
	Extension cable, 2 core Super Seal socket > Super Seal plug Conductor cross-section: 2x1 mm ² Cable type: FLRYY / PVC	
	1.000 mm	794 010 200
	1.500 mm	794 015 200

	2.000 mm	794 020 700
	AMP 1.5 socket, straight > AMP 1.5 plug, straight	

Extension cable

	Application / Description	Article no.
	Adapter cable, 7 core Conductor cross-section: $6 \times 1 \text{ mm}^2 + 1 \times 2,5 \text{ mm}^2$ Cable type: FLRYY / PVC 300 mm AMP 1,5 socket, straight > AMP 1,5 socket, straight 	794 003 740
	Extension cable EBS 7 core - ISO 7638 Conductor cross-section: $5 \times 1,5 \text{ mm}^2 + 2 \times 4 \text{ mm}^2$ Cable type: FLRYY/PVC Not ADR-approved 1500 mm Socket ISO 7638 > plug ISO 7638  Should be used for extension of the chassis. The cable is extended with 1500 mm from the original plug - removal of the original plug is avoided, hence time is saved	994 015 075
	Extension cable 15 core - ISO 12098 Conductor cross-section: $12 \times 1 \text{ mm}^2 + 3 \times 2,5 \text{ mm}^2$ Cable type: FLRYY/PVC Not ADR-approved 1500 mm Socket ISO 12098 > plug ISO 12098  Should be used for extension of the chassis. The cable is extended with 1500 mm from the original plug - removal of the original plug is avoided, hence time is saved	994 015 155

Y-Adapter cable

	Application / Description	Article no.
	Y-Adapter cable, 2 core Conductor cross-section: 2x1 mm ² Cable type: FLRYY / PVC	
	2 x 500 mm 1 x Super Seal socket + 2 x Super Seal plug	894 005 200
	2 x 1.000 mm 1 x Super Seal socket + 2 x Super Seal plug	894 010 200
	Y-Adapter cable, 2 core 3 x Super Seal plug Conductor cross-section: 2x1 mm ² Cable type: FLRYY / PVC	
	2 x 500 mm	894 005 230
	2 x 2000 mm	894 020 230
	2 x 3000 mm	894 030 230
	2 x 4000 mm	894 040 230
	2 x 6000 mm	894 060 230
	Y-Adapter cable, 2 core 1 x Super Seal plug + 2 x Super Seal socket Conductor cross-section: 2x1 mm ² Cable type: FLRYY / PVC	
	2 x 500 mm Super Seal socket	894 005 240

Y-Adapter cable

	Application / Description	Article no.
	Y-Adapter cable, 6 core 1 x AMP 1.5 socket, straight + 2 x AMP 1.5 plug, straight Conductor cross-section: 5x1mm² + 1x2,5 mm² Cable type: FLRYY / PVC 2 x 500 mm 	894 005 640
	Y-Adapter cable, 6 core 1 x AMP 1,5 plug, straight + 2 x AMP 1,5 socket, straight With 1x2 core outlet (200 mm) with Super Seal socket for connection of position or side marker lights Conductor cross-section: 5x1mm² + 1x2,5 mm² / 2x1 mm² Cable type: FLRYY / PVC 2 x 300 mm 	894 003 641

Y-Adapter cable

	Application / Description	Article no.	
	Y-Adapter cable, 7 core 7 poled AMP socket > 2 x Super Seal plug with outlet for stop and direction indicator light Conductor cross-section: 2 x 0,5 mm² Cable type: FLRYY / PVC 2 x300 mm	994 003 282	
Pin configuration 7 poled AMP socket: 1 = Ground 4 = Direction indicator 5 = Stop			
Pin configuration 2 poled super seal plug: 1 = Ground 2 = Stop / direction indicator			
Complementary to the TM14 Slim-Line light series			
Pin configuration 7 poled AMP socket: 1 = Ground 2 = Position 4 = Direction indicator 5 = Stop	Y-Adapter cable, 7 core 7 poled AMP socket > 1 x 3 poled Super Seal plug with outlet for stop and direction indicator light + 1 x 2 poled Super Seal plug with outlet for direction indicator light Conductor cross-section: 2 x 0,5 mm² Cable type: FLRYY / PVC 2 x 300 mm	994 003 285	
Pin configuration 3 poled super seal plug: 1 = Ground 2 = Position 3 = Stop			
Pin configuration 2 poled super seal plug: 1 = Ground 2 = Direction indicator			
Complementary to the TM14 Slim-Line light series			

Coil cable

	Application / Description	Article no.
	Coil cable 9 core Open end > Open end Number of coils: 26 Inside diameter: Ø 50 mm Conductor cross-section: $7 \times 1 \text{ mm}^2 + 2 \times 2,5 \text{ mm}^2$ Cable type: PUR Working length 3.500 mm 	994 035 990
	Coil cable 15 core 15 poled plug ISO 12098 Inside diameter: Ø 38 mm Outside diameter: Ø 66 mm Conductor cross-section: $12 \times 1,5 \text{ mm}^2 + 3 \times 2,5 \text{ mm}^2$ Cable type: PUR Working length 4.000 mm 	090 165 813
	Coil cable ABS 5 core Socket ISO 7638-1 Inside diameter: Ø 22 mm Outside diameter: Ø 48 mm Conductor cross-section: $2 \times 4 \text{ mm}^2 + 3 \times 1,5 \text{ mm}^2$ Cable type: PUR Working length 4.000 mm 	090 195 440

Accessories

	Application / Description	Article no.
	Plate grip for Click-In system For cable with click-in system Flexible and uncomplicated assembly	099 859 970
	Click-In cable 1,5 mm² with open end 500 mm 1.500 mm 3.500 mm	794 005 280 794 015 280 794 035 280
	Cap for Click-in cable 1,5 mm² 10 pcs per plastic bag	098 291 950
	Adapter, double click-in 1,5 mm For connection of two flat cables Suitable for 1,5 mm² flat cable Must be mounted with 2 pcs. of 098 291 950 clamps (included) Dimension: 68 x15 x 22,1 x 15,4 mm	099 110 032
	Adapter, double click-in 1,5 mm For connection of two flat cables Suitable for 1,5 mm² flat cable Must be mounted with 2 pcs. of 098 291 950 clamps (not included) Dimension: 68 x15 x 22,1 x 15,4 mm.	099 110 030
	Adapter, double click-in For connection of two flat cables, 1,50 <-> 0,75 mm Length: 120 mm Incl. clamps	099 110 031
	End plug for flat cable for 1,5 mm² click-in Dimension: Ø15 x 35 mm.	099 110 031

JUNCTION BOX

Junction boxes

- standardized solutions for optimal configuration

Universal Junction Box

The universal junction box is without pre-configured connections and cable exits and is universal for various applications.

The cable entries are prepared for different cable dimensions and can - if needed - be replaced with other cabling sizes, Super Seal sockets or 7 poled AMP sockets.

Junction box for crane modules - with many possibilities

By integrating the EEMAX junction box in the cables system, it is possible to get all AUX functions, which normally exist on a trailer.

With other words - With this junction box it is possible to use all pre-configured ISO12098 connections (pin 9-15). E.g. for the work light, warning light or other ordinary power supply.

All functions are available by using the Super Seal socket or cable glands. For crane module solutions it is necessary that the tail lights are installed in the junction box, as the tail lights can thus be passed on to the crane module.

Your advantages with EEMAX solution:

- Unique flexibility due to fast and easy replacement of cable entries and sockets (2 poled Super Seal and 7 poled AMP sockets)
- Time-saving and easy built-in of the junction box due to pre-cabling
- Various free cables entries for universal use
- 2 sizes are available. The flat version can easily be re-built into double size
- 15 poled sockets can be integrated

Spare part overview - see the end of this section

PLUG TYPE & PIN CONFIGURATION

OVERVIEW - PLUG CONNECTION FOR ERMAL LIGHTING SYSTEMS

Plug type, designation and dimension

2 poled Click-in plug

Click-in cap

2 poled Super Seal plug

2 poled Super Seal socket

7 poled AMP 1.5 plug

7 poled AMP 1.5 socket

15 poled Bayonet plug

15 poled Bayonet socket

7 poled plug - ISO 1724

7 poled socket - ISO 1724

7 poled plug - ISO 3731 / ISO 1185

7 poled socket - ISO 3731 / ISO 1185

15 poled ADR plug - ISO 12098

15 poled ADR socket - ISO 12098

Frontbox

Pin configuration Type N 24V, 7 poled ISO 1185

	Color	Description
	1 / 31	White
	2 / 58L	Black
	3 / L	Yellow
	4 / 54	Red
	5 / R	Green
	6 / 58R	Brwon
	7	Blue
		Ground (-)
		Position and marker light Left ¹⁾
		Direction indicator light Left
		Stop light
		Direction indicator light Right
		Position and marker light Left ¹⁾
		Aux2 / Stop control for trailer

¹⁾ The license plate light must be connected so that no lights of this illumination have common connection with pin 2 and 6

Pin configuration Type S 24V, 7 poled ISO 3731

	Color	Description
	1 / 31	White
	2	Black
	3	Yellow
	4	Red
	5	Green
	6	Brown
	7	Blue
		Ground for pin 9-15 (ISO 12098)
		No allocation (CANH, Data communication)
		Reverse light
		Permanent power supply (+)
		No allocation (CANL, Data communication)
		Aux3 / Lift axle
		Rear fog light

Pin configuration ABS-EBS 24V, 5/7 poled ISO 7638

	Color	Description
	1	Red
	2	Black
	3	Yellow
	4	Brown
	5	White
	6	White-Green
	7	White-Brown
		Plus electro valve
		Plus electronic
		Minus electronic
		Minus electro valve
		Warning unit
		Data communication
		Data communication

Pin configuration N-type 12V, 7 poled ISO 1724

	Color	Description
	L / 1	Yellow
	54G / 2	Blue
	31 / 3	White
	R / 4	Green
	58R / 5	Brown
	54 / 6	Red
	58L / 7	Black
		Direction indicator light Left
		Rear fog light
		Ground (-)
		Direction indicator light Right
		Position-, side markers-and license plate light, Right ¹⁾
		Stop light
		Position-, side markers-and license plate light, Left ¹⁾

¹⁾ The license plate light must be connected so that no lights of this illumination have common connection with pin 5 and 7

Pin configuration 24V, 15 poled ISO 12098

	Color		Description
	1	Yellow	Direction indicator light Left
	2	Green	Direction indicator light Right
	3	Blue	Rear fog light
	4	White	Ground (-)
	5	Black	Position and marker light Left ¹⁾
	6	Brown	Position and marker light Right ¹⁾
	7	Red	Stop light
	8	Pink	Reverse light
	9	Orange	Permanent power supply (+)
	10	Gray	Aux1 / Brake-wear-sensor
	11	White / Black	Aux2 / Stop control for trailer
	12	White / Blue	Aux3 / Lift axle
	13	White / Red	Ground for pin 9-15 (ISO 12098)
	14	White / Green	CANH, Data communication
	15	White / Brown	CANL, Data communication

¹⁾ The license plate light must be connected so that no lights of this illumination have common connection with pin 5 and 7

Pin configuration Ermax 15 poled Bayonet plug

	Color		Description
	1	Black	Position and marker light Left
	2	Yellow	Direction indicator light Left
	3	Red	Stop light
	4	White / green	CANH, Data communication
	5	White	Ground (-)
	6	Pink	Reverse light
	7	White / Black	Aux2 / Stop control for trailer
	8	White / red	Ground for pin 9-15 (ISO 12098)
	9	Orange	Permanent power supply (+)
	10	Blue	Rear fog light
	11	Gray	Aux1 / Brake-ware sensor
	12	White / brown	CANL, Data communication
	13	Brown	Position and marker light Right
	14	White / blue	Aux3 / Lift axle
	15	Green	Direction indicator light Right

Pin configuration AMP plug 7 poled

		Color	Description
	1	White	Ground (-)
	2	Green	Position light
	3	Brown	Reverse light
	4	Yellow	Direction indicator light
	5	Red	Stop light
	6	Blue	Rear fog light
	7	-	-

Pin configuration AMP plug 4 poled

		Color	Description
	1	Blue	Permanent power supply (+)
	2	Brown	Ground (-)
	3	-	(not connected)
	4	-	(not connected)

Pin configuration Super Seal plug 3 poled

		Color	Description
	1	Brown	Ground (-)
	2	Blue	Position light
	3	Yellow / Green	Stop light

Pin configuration Super Seal plug 2 poled

		Color	Description
	1	Brown	Ground (-)
	2	Blue	Permanent power supply (+)

Pin configuration Deutsch (DT2) plug 2 poled

		Color	Description
	1	Blue	Permanent power supply (+)
	2	Brown	Ground (-)
